# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA**

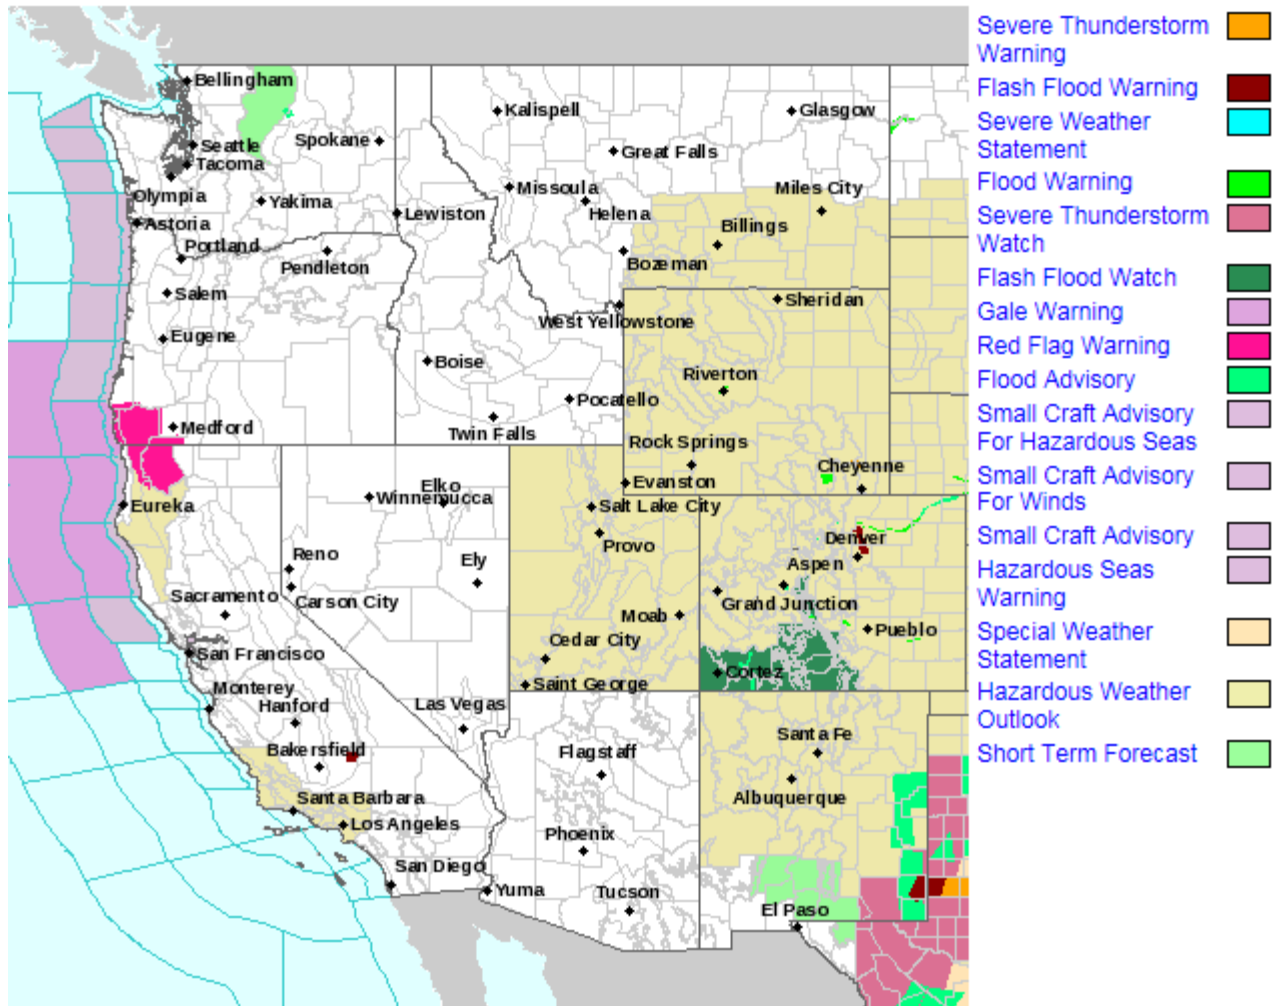

The high pressure that brought record heat to Northern California on Friday will move off to the southeast today as a large low pressure area over British Columbia deepens. In the upper levels a dry southwest-northwest flow pattern will develop and remain in place through next week. There will be enough instability near the Oregon state line for afternoon buildups each day beginning Sunday, and there is a slight chance that a stray afternoon thunderstorm may develop in that area as well. The north-northeast/offshore surface wind pattern is fairly weak this morning, except in far northwest California where a few ridgetops are seeing gusts to 30-40 mph. This wind pattern will further weaken by midday today and return even weaker tonight. Winds west of the Cascade-Sierra Crest will be light to moderate slope winds Sunday through Friday, but areas east of the crest will see moderate afternoon south to west winds each afternoon, with some locations seeing gusts of 25-35 mph each day.

### **SOUTHERN CALIFORNIA**

The low pressure area that brought showers and thunderstorms to the mountains and deserts yesterday is now over Baja and only isolated showers and thunderstorms will form over the Sierra and over the mountains of Southern California east of the Cajon Pass this afternoon. High pressure over the Eastern Pacific will expand north and east bringing a slow warming and drying trend to the region through Tuesday. Maximum temperatures will be in the upper 70s and 80s across the mountains and coastal valleys and 90s to 102 in the inland valleys today. Minimum humidity will be between 15% and 30%. The marine layer, which is around 3,000 feet deep across Southern California today, will slowly shrink through early next week as the high pressure expands. High pressure will weaken bringing a slow cooling trend and a slow increase in humidity to the region Wednesday through the end of next week. No thunderstorm activity is expected across the region after today.

# **CAL OES 2014 DROUGHT**

## **Cal EOC Incident – 2014 Drought**

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Regional (Inland, Coastal, Southern) conference calls continue to occur on a weekly basis.

# CAL OES 2014 DROUGHT

## Cal EOC Incident – 2014 Drought
